INDEX:

RSI14	The relative power index, or RSI of 14 days, determines overbought or oversold market conditions. It is measured on a scale of 0 to 100. Indications below 20 show over-selling, while the indications above 80 indicate over-buying.
65maRSI	The 65-day moving average of the 14-day RSI is measured on the same scale as RSI. It works in conjunction with RSI. RSI results over 65 days Moving Average show support for upward RSI movement, values below 65 days M.O. show the opposite.
%B	Formula% B shows us where the value is relative to the Bollinger strips. Continuous values close to 1 mean dynamic upward disposition, consecutive values close to zero indicate dynamic downward disposition. Ascending or Incremental escalation of% B either from extreme values or from the middle value of 0.50 precedes us for analogous motion. 1 defines the upper Bollinger, 0.50 middle and zero down. The middle Bollinger is the 20-day M.O.
ADX	The ADX Middle Direction Indicator measures the power of the trend, without affecting its direction. When it is over 26 means there is a trend.
DI+ DI-	The positive direction indicator DI + measures the positive force of the trend. The negative direction indicator DI- measures the negative force of the trend. Whichever is higher than the other leads the trend to its side. The ideal entry point is exactly when one of the two gets higher than the other, with ADX values higher than 26, of course.
AD%	This oscillator: Accumulator - Distribution, AD%, is a 10 day volume oscillator in relation to the closing opening prices as well as the extreme values that the share receives each day. When it is positive, it means an upwardly available price, supported by the volume. The reverse is true for its negative values. It is used to confirm or not, the strength of each short-term motion.
SMA65	The 65-day Moving Average, SMA65, is a trend indicator. Specifically, the average is 3 months in business days. When the value is higher than SMA65 shows Upward Medium Voltage. When the value is below SMA65 it shows Descending Medium-Term Trend. It can also act as a conservative entry point when the stock gets more than SMA65.
Short-term movement	Movement up to calculation date.
Mid-term movement	Movement up to calculation date.
Sharp: Πάρα πολύ Δυνατή - Strong: Δυνατή - Neutral: Ουδέτερη - Up Trend: Ανοδική Τάση - Down Trend: Καθοδική Τάση - Upward: Ανοδική - Downward: Καθοδική
